Assessment Reveals Further Impact of La Habra Quake

April 7, 2014

In an email Sunday, April 6, updating Titan community members on findings from the University’s ongoing assessment of damage following the March 28 earthquake, Provost José L. Cruz noted that further review of the Pollak Library had turned up damage to some of the facility’s ventilation systems.

Because affected systems must be shut off during repairs, floors 2-6 of Pollak Library South (PLS) are closed until further notice.

Cruz expressed his "appreciation for the many people who have been working so hard to help us recover from the earthquake."

Until further notice, students, faculty and staff are alerted to these relocations:

- The Chicana and Chicano Resource Center (CRC) in PLS will remain in its current location on the first floor, but access will be from outside on the building’s east side. All other programs and services of the CRC will continue as normal.
- The Titan Card center and Circulation desk on the first floor of PLS have been moved, respectively, to the second and fourth floors of Pollak Library North (PLN).
- The Titan Computer Lab in PLN 30 will be relocated to the first, second and fourth floors of PLN.
- All Information Technology administrative offices located in the library will be relocated to PLN 30.
- The Academic Technology Center service desk in PLS 237 will be relocated to the second floor of PLN, using the service desk of Digital Print Services.
- The Telecommunications Office in PLS 244 will be relocated to the seventh floor of Langsdorf Hall.
- The library’s administrative offices located on the second floor of PLS will be relocated to PLN 321 and PLN 322. In addition, Collections and Processing Unit staff will be relocated to PLN 103, Interlibrary Loan Services staff will be relocated to PLN 121, and Library Systems and University Archives staff will be relocated to PLN 420 and PLN 445.
- The Center for Oral and Public History in PLS 363 will be relocated to PLN 30.

Temporary signage in the library will help direct visitors. Phone numbers for these service areas will remain unchanged.

For additional information specifically about Information Technology services, please call extension 8500 or visit http://www.fullerton.edu/IT.

Previous campus reports (http://news.fullerton.edu/2014sp/0328temblor.asp) on the impact of the Friday, March 28, earthquake were published on March 29 and March 31.
